

**CLAIMS:**

What is claimed is:

1. (Previously Presented) A low-smoke gas generating composition for producing a low order pressure pulse comprising a compound having the chemical structure:

wherein  $\text{Z}^+$ , when present, is  $\text{H}^+$  or a cation;  $\text{R}_1$  is an electron donating group and wherein  $m = 1, 2$  or  $3$ ;  $t = 0$  or  $1$ , and  $n = 0, 1, 2$  or  $3$ ; and when present,  $\text{R}$  is a complexing component and  $x = 1, 2$  or  $3$ ;

wherein either  $\text{Z}$  or  $\text{R}$  may be absent.

2. (Previously Presented) The low-smoke gas generating composition of claim 1, wherein  $\text{Z}^+$  is  $\text{H}^+$ .

3. (Previously Presented) The low-smoke gas generating composition of claim 1, wherein  $\text{Z}^+$  is a cation.
